A calmer workspace

Good tools make complex work feel approachable.

Keep the next useful action visible.

Group related controls and leave enough room to think.

Use a clear hierarchy, familiar patterns, and timely feedback.

A practical review checklist

Review the details before sharing your workspace.

1. Can every action be reached with the keyboard?

2. Is the important information clear at a glance?

3. Do loading, empty, and error states help the reader?

4. Are related controls kept close to their task?

5. Does the layout have room to breathe on small screens?
